

The Automated Data Governance Company

The Immuta Automated Data Governance Platform gives you granular, dynamic control of who accesses your data and why — without copying data or writing a single line of code. The result is instant data self-service with powerful security and oversight.

CONNECT TO YOUR DATA

Connect to all your data without making copies.

Connect to data wherever it lives — in the cloud, on premises, or both — without having to copy it. Immuta provides a virtual, centrally accessible view of all your data.

APPLY POLICIES

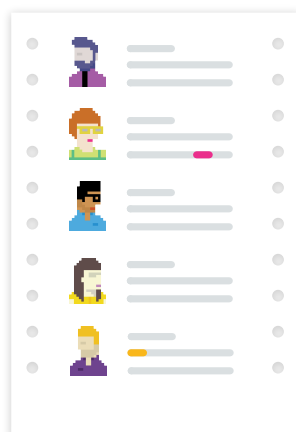

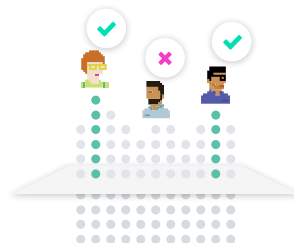

Author complex policies easily, no code required.

Immuta's intuitive policy builder allows anyone, of any technical skill, to understand, author, and enforce complex security and privacy policies, e.g. CAPCO, without code.

ENABLE SELF-SERVICE

Turn on controlled, self-serve access to data.

Because Immuta enforces your policies continuously and dynamically, your users can access the data they need — and only what they're allowed to see.

PROVE COMPLIANCE

Show who used what data, when, and why.

Immuta gives you immediate insight into how data is being used across your organization, making it easy to prove compliance and make smart policy decisions.

Deployment Options

We believe that all data should be protected no matter where it resides. Immuta was architected to run anywhere as a fully containerized solution in the cloud, on prem, or both, to meet the varying needs of our customers.

C2S

GovCloud

Hybrid

On-Prem

Certification & Accreditation

Immuta is currently certified and in production on lowside and highside production environment within the DoD and IC.

Build Secure Analytics Faster & Safer

**CENTRAL POLICY
AUTHORING AND
ENFORCEMENT**

**SECURE DATA
COLLABORATION**

**POLICY INHERITANCE
ON DATA MASHUPS**

**UNIFIED REPORTING
ON ALL DATA USAGE**

Partnering with Immuta has enabled LMI data scientists to access sensitive government data faster while maintaining compliance with the required governance regulations and privacy. Given the complexity of these datasets, Immuta has been a force multiplier to accelerate delivery of insight to LMI's clients."

– Joseph Norton, Ph.D.,
Director of Data Visualization and Product Development, LMI

HOW WE FIT INTO YOUR ECOSYSTEM

Any Data. Any Tool. No Code.
